

# E.F.T PRACTITIONER TRAINING COURSE

## What is E.F.T ?

E.F.T stands for Emotional Freedom Technique (also known as tapping). This 21st-century energy technique was developed by Stanford graduate, Gary Craig, after a lifelong interest in personal improvement. Gary Craig discovered that stimulating the major meridians by tapping on acupuncture points on the head and body, while simultaneously focusing on specific issues, could lead to remarkable alterations in the body's energy patterns. This shift of energy results in substantial freedom from emotional and physical symptoms which literally rewires energy disruptions – often eliminating them entirely. In some instances, in minutes

These energy psychology techniques have been used successfully on a wide range of issues e.g. anxiety, stress, depression, phobias, addictive cravings, traumatic memories, physical pain, and disease. It has a clinically proven high success rate with the ability to bring quick and permanent relief and can be used on virtually anything. EFT has now successfully reached every continent on

the planet thanks to its amazing success rates. Another reason for E.F.T's success is that it is not only a highly effective practitioner-based therapeutic tool but it's also a simple, easy to learn, self-help method that empowers children, young people and adults.
